

Screensaver installation instructions

Mac OS X

1. Place the desired screensaver photos in a specified folder within Photos or add your images to a new event in iPhoto.
2. Open System Preferences by right-clicking anywhere on the desktop and choosing Change Desktop Background.
3. Select the Screen Saver tab.
4. Scroll down on the left under Screen Savers to find either the folder you created or the iPhoto event. Select it and close System Preferences.

Windows XP

1. Place the desired screensaver photos in the My Pictures folder or create your own folder for the images.
2. Access Properties by right clicking anywhere on the desktop.
3. Select the Screen Saver tab, then click on My Pictures...Slideshow...Settings.
4. Configure the settings according to the options given.

Vista

1. Open Windows Photo Gallery, then click on File...Screen Saver...Settings.
2. Choose Photos from the Screen Saver drop-down menu.
3. Then choose Settings. Within Settings, you can further customize the screensaver. You have the option to:
 - show only pictures with a particular tag,
 - display only pictures with a particular rating,
 - apply a slide show theme, or
 - play your pictures in random order.
