

REED COLLEGE

Registration Planning Worksheet

Student name: _____

Adviser's name: _____

Meeting time: _____

6 digit SOLAR PIN: _____

INSTRUCTIONS: Complete this form with courses you would like to take in the upcoming academic year. You can find course information in the [Schedule of Classes](#). **List at least 3 courses and one or two alternates.** Have this worksheet completed and ready for review for your Registration Coach meeting and Academic Adviser meeting.

When you complete the worksheet, keep in mind:

- Minimum enrollment is 3 units, maximum enrollment is 4.5 units per semester.
- Register for HUM 110 Y - it is the only course that is 1.5 units each semester.
- Check that you have fulfilled the prerequisites (if any) for the courses you have listed.
- Make sure there are no scheduling conflicts between the courses you have listed.
- Have alternatives ready if courses are full or closed.
- Take a PE class in the first and second quarter of the fall semester. They are each 7 weeks long. Register for spring PE in November.
- SOLAR is the Student Online Registration System, used for all course adding and dropping.
- The CRN is the Course Registration Number that you will use to register on SOLAR.
- A Course Code is made up of a Subject, Number, and Section. The Subject is the department that offers the course, the number indicates level (200 and 300 are usually more advanced), and the section shows if there is more than one class offered.
- The Schedule of Classes uses a 24 hour clock to avoid confusion.
- Select your first two courses and then find a HUM 110 Y section that will fit in both fall and spring. You must enroll in the same section with the same instructor in fall and spring.
