In the *Journal of Economic Perspectives* paper by Schwabish, compare the original graphs with the recommended improved versions.

- a. What, specifically, do you find easier to understand about the revised versions for examples 5A/5B and 6A/6B (or do you prefer the originals)?
- b. Which alternative do you prefer among 9A/9B/9C/9D? What, specifically, do you find most helpful about that variant compared to the others?
