

Hum 110: Study questions on Herodotus

1. Analysis of an Argument: briefly summarize Bernal's and Leftkowitz's arguments. Which do you find more persuasive and why? (What makes an argument persuasive?) Use an example from Herodotus to support the position you admire more.
2. How does Herodotus define non-Greeks? What criteria does Herodotus use to distinguish the Greeks from others? How does this compare to the usual characteristics we use for defining those who are "not like us"?
